422 <h3>Fun to create a shell</h3>
423 <p>For a programmer, it must be far easy and fun to create his own simple shell
424 rightly fitting to his favor and necessities, than learning existing shells with
425 complex full features that he never use.
426 I, as one of programmers, am writing this tiny shell for my own real needs,
427 totally from scratch, with fun.
428 </p>
429 For a programmer, it is fun to learn new computer languages. For long years before
430 writing this software, I had been specialized to C and early HTML2 :-).
431 Now writing this software, I'm learning Go language, HTML5, JavaScript and CSS
432 on demand as a novice of these, with fun.
433 </p>
434 This single file "gsh.go", that is executable by Go, contains all of the code written
435 in Go. Also it can be displayed as "gsh.go.html" by browsers. It is a standalone
436 HTML file that works as the viewer of the code of itself, and as the "home page" of
437 this software.
438 </p>
439 Because this HTML file is a Go program, you may run it as a real shell program
440 on your computer.
441 But you must be aware that this program is written under situation like above.
442 Needless to say, there is no warranty for this program in any means.
443 </p>
