456 <details id="GshStatement" class="gsh-document"><summary>Statement</summary>
457 <h3>Fun to create a shell</h3>
458 <p>For a programmer, it must be far easy and fun to create his own simple shell  

459   rightly fitting to his favor and necessities, than learning existing shells with  

460   complex full features that he never use.  

461   as one of programmers, am writing this tiny shell for my own real needs,  

462   totally from scratch, with fun.  

463 </p><p>  

464 For a programmer, it is fun to learn new computer languages. For long years before  

465 writing this software, I had been specialized to C and early HTML2 :).  

466 Now writing this software, I'm learning Go language, HTML5, JavaScript and CSS  

467 now demand as a novice of these, with fun.  

468 </p><p>  

469 This single file "gsh.go", that is executable by Go, contains all of the code written  

470 in Go. Also it can be displayed as "gsh.go.html" by browsers. It is a standalone  

471 HTML file that works as the viewer of the code of itself, and as the "home page" of  

472 this software.  

473 </p>
474 Because this HTML file is a Go program, you may run it as a real shell program  

475 on your computer.  

476 But you must be aware that this program is written under situation like above.  

477 Needless to say, there is no warranty for this program in any means.
